

# Your Fan Coil Motor is about to get

# Smart.

## Save Money.

- 40-82% Power Reduction

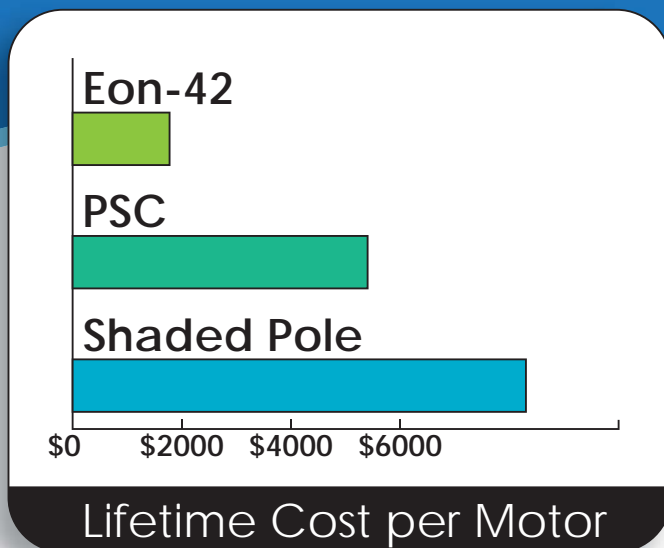

## Works Better.

- Reduced Fan Noise
- Higher, customizable airflow
- Reduced maintenance

## Trusted.

Existing installations include:

- Chrysler Building in NYC
- MGM Grand in Las Vegas
- Marriott Group
- Starwood Group
- Taj Group

# Introducing the EON 42

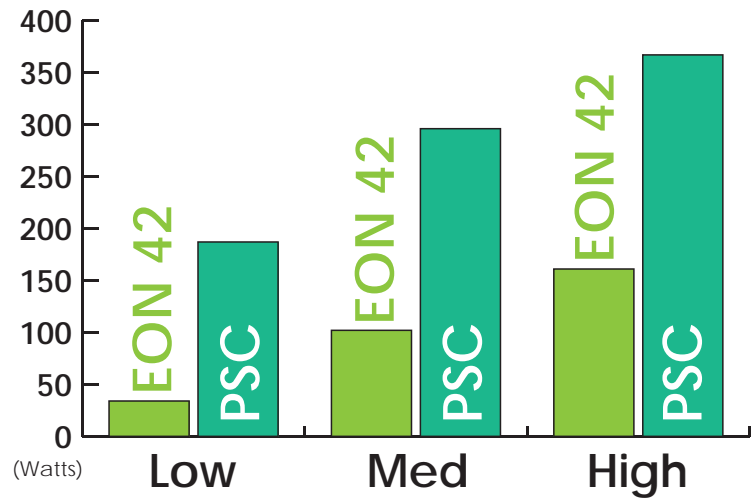

The new Eon 42 is an Electronically Commutated Motor (EC Motor) for HVAC systems that uses up to 88% less energy while producing as much as 39% greater airflow and an 18 dB less noise on average. Depending on the motors in place, duty cycle, and prevailing price of power, upgrading fan coil unit motors in HVAC systems to the EON 42 generates an expected simple payback period of between .78 to 2.65 years.

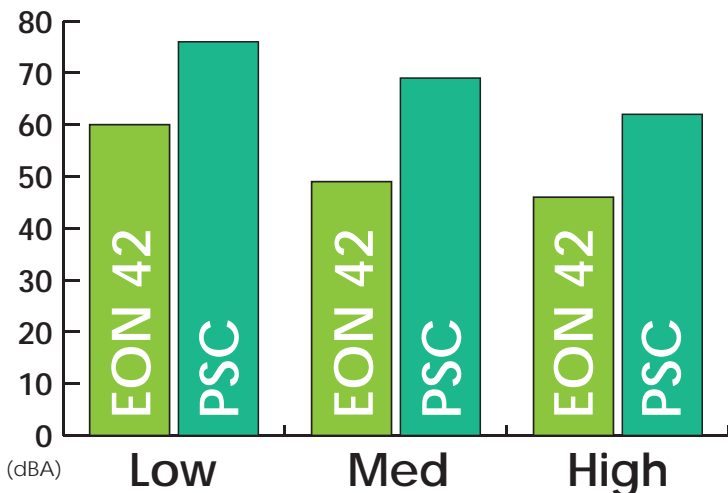

## Better Airflow

## Less Energy

## Less Noise

## Less Heat
